AAIS Calendar of Events (Jan-Jun 2023)

2023 marks the 20th Anniversary of the Association of Aerospace Industries (Singapore). In celebration of this special occasion, AAIS will be presenting an exciting line-up of events ranging from networking events, trade shows to the industry favourites – our annual sporting tournaments. Multiple sponsorship opportunities are also available via the commemorative 20th Anniversary Projects.

We welcome all members, partners, and associates to partake in these activities as we celebrate this special milestone together. Mark your calendars today, for events in the first half of the year! For further enquiries on events and opportunities or the full-year calendar of events, please reach out to admin@aaais.org.sg.

AAIS Calendar of Events (Jan-Jun 2023)

Recent Activities

Visit by European Parliament Transport Committee

AAIS was very pleased to host a delegation of the European Parliament's Committee on Transport and Tourism on 2 November 2022 at Seletar Aerospace Park. The delegation was visiting Singapore to explore innovative solutions in the transport sector. Led by Committee Chair MEP Jens Gieseke, the delegation visited AAIS and Skyports Drone Services. Chief Executive AAIS, and Sanjay Suresh and Koh Jia Le of Skyports briefed the delegation on the aviation and aerospace recovery, and development of drone services in Singapore.

AAIS Year-End Networking Evening @ Bombardier

AAIS warmly welcomed members of the aerospace and UAS communities, as well as partners, to our Year-End HOST Networking evening on Thursday, 1 December 2022. The event brought out the festive spirit and marked the return of in-person HOST networking evenings for members since going virtual during the circuit breaker in 2020.

AAIS President Wong Yue Jeen kicked off the evening with a brief update on industry and AAIS activities. Simon Wayne, GM for Asia Pacific at Bombardier Singapore Service Centre – co-host of the evening, then gave a brief overview of the facility and its capabilities. Guests were invited on an exclusive tour of the centre and relished the opportunity to reconnect face-to-face with industry friends and get to know new faces. Some gamely participated in a Christmas tunes quiz and 3 lucky guests won prizes at the lucky draw.

We thank all guests for joining us, Simon and his team at Bombardier Singapore Service Centre for their warm hospitality and excellent support for the event. The next HOST Networking event is scheduled for 6 February 2023. Please mark your calendars!

AAIS Annual Futsal Tournament 2022

Even before 'World Cup fever' grips football fans, AAIS saw dramatic and nail-biting moments on the pitch at our very own AAIS Annual Futsal Tournament 2022. Held on Saturday, 19 November at the FutsalArena@Yishun, the event saw teams from organisations across the aerospace industries vying for the Championship trophy and bragging rights as the top Futsal team in the sector.

After a two-year pause on the popular tournament, participants were ready and raring to go, enlivened by strong support from colleagues and family members. The tournament saw spirited competition between teams from the very first whistle. Ultimately, Singapore Aero Engine Services Private Limited (SAESL) emerged as champions, with Rolls-Royce Singapore and Advance Remanufacturing and Technology Centre as runners-up. Fourth place went to Pratt & Whitney Component Solutions. Our heartiest congratulations to all players, especially Mohammed Imran bin Ismail, the 2022 Tournament's Most Valuable Player!

Training Courses

Drone Security Operations Certificate (DSOC)

Drones are cyber-physical systems, meaning they are hovering computer systems made up of networks similar to that of traditional IT systems. Increasingly, drones are internet-connected and hence provide new potential avenues for compromise leading to information leakage and data breaches which could result in significant financial and reputational loss.

If your organisation is developing drones in-house or purchasing them from a vendor, this often necessitates upskilling of staff in regard to the use, security and responsibilities that come with the use of drone technologies. Organisations, government bodies and councils have a duty of care to their staff, customers and the general public when it comes to the use of, and defence against, drones.

DroneSec specialises in creating and delivering the most up-to-date drone security programs that would benefit you and your organisation. You may acquire the following courses in a self-paced online environment:

Drone Security Operations Certificate (Online Training)

Level 1: Drone Security Fundamentals

Level 2: Drone Security Regulations

Level 3: Drone SecOps: Offense & Defense

Enjoy a 25% discount when you sign up through the Singapore UAS Community using the dedicated promotion code (see website below for the code).

Upcoming Activities

Learning Journey to Sodick Singapore Techno Centre (SSTC)

Jan 12, 2023
(2:00 PM - 5:00 PM)
(GMT+8)

LaunchPad @ Jurong ...
Singapore

AAIS is pleased to invite members on a Learning Journey to the Sodick Singapore Techno Centre to learn about advanced manufacturing and capabilities that can help companies transform and adopt new technologies. A special focus of the programme is Additive Manufacturing (AM), which has the potential to revolutionise the industry in terms of increased design freedom, opportunities for customisation, faster product development cycles and, in some circumstances, the ability to manufacture at the point of need.

Find out about Sodick's metal 3D printers and the resources available at SSTC to support aerospace manufacturers and MRO companies including prototyping services and developing proof of concepts with Sodick 3D printing technology. Learn how SSTC, in collaboration with the Singapore Institute of Technology (SIT), can provide support for specific needs and requirements of the highly regulated aerospace industry.

Gateway to Airports in Asia and beyond

inter airport Southeast Asia (IASEA) is Asia's premier airport exhibition and conference that covers all areas of airport-related technology, equipment and services, in one place.

As Asia-Pacific airports projects to reach full recovery by 2024, IASEA is engineered to give you first-hand access to key sales leads from Asia, opportunity to showcase solutions, develop quality relationships with some of Asia's most influential airport executives through face-to-face interactions and gain valuable insights on trends that are shaping the future of Asia's airports.

This is where you make an impression in Asia, that count.
