

SINGAPORE UNMANNED AIRCRAFT SYSTEMS COMMUNITY

SG UAS Community Updates: November 2022

EU-Asia Symposium on UAS/UAM

Members of the Singapore UAS Community participated in the EU-Asia Symposium on UAS/UAM held at the Goodwood Park Hotel on 18-21 Oct 2022 by invitation of CAAS and EASA. The occasion was also marked by the signing of a Memorandum of Understanding between CAAS and EASA to collaborate on urban air mobility to support the development, deployment and safe operation of vertical take-off and landing (VTOL) aircraft. Click on the photograph below to read the summary from industry presentations on Day 1 of the Symposium.

First In-Person Networking Event

The Singapore UAS Community was excited to hold its first in-person networking event on 4 October 2022 at Brewerkz, Orchard Rendezvous Hotel. Organised in partnership with Montgomery Asia and Drones Asia 2023, the event attracted more than 40 participants. Following great conversations and bonding with new friends over beer and bites, we capped the evening with a lucky draw graced by Mr Rupert Owen, co-founder of

GeoConnect Asia and **Drones Asia**. View photographs of the event by clicking on the picture below.

Unmanned Aircraft (UA) Registered in Singapore

Since 20 April 2020, any person who operates an UA with a take-off weight above 250 grams, is required to register with CAAS. The chart below tracks the growing UA registrations over the past 2.5 years, be it for recreational, educational or business purposes.

Training Courses

Drone Security Operations Certificate (DSOC)

Drones are cyber-physical systems, meaning they are hovering computer systems made up of networks similar to that of traditional IT systems. Increasingly, drones are internet-connected and hence provide new potential avenues for compromise leading to information leakage and data breaches which could result in significant financial and reputational loss.

If your organisation is developing drones in-house or purchasing them from a vendor, this often necessitates upskilling of staff in regard to the use, security and responsibilities that come with the use of drone technologies. Organisations, government bodies and councils have a duty of care to their staff, customers and the general public when it comes to the use of, and defence against, drones.

DroneSec specialises in creating and delivering the most up-to-date drone security programs that would benefit you and your organisation. You may acquire the following courses in a self-paced online environment:

Drone Security Operations Certificate (Online Training)

Level 1: Drone Security Fundamentals

Level 2: Drone Security Regulations

Level 3: Drone SecOps: Offense & Defense

Enjoy a 25% discount when you sign up through the Singapore UAS Community using the dedicated promotion code (see website below for the code).

Upcoming Activities

AAIS Industry Safety Week

Nov 14 - 18, 2022
(GMT+8)

With a significant number in the workforce who are new to the industry, there is a need to emphasise and create greater awareness of aviation safety. Experienced professionals will also benefit from refreshers on safety with the ramp-up of operations.

AAIS, as a signatory of Singapore's charter for aviation safety, is pleased to organise a coordinated safety week for

members of the aviation/aerospace community from 14 to 18 November 2022. We invite you to register to participate with a commitment to organise an internal aviation safety awareness campaign (an hour, day or week) during this period, in sync with others in the industry.

To support aviation safety awareness in your organisations and augment your internal efforts, AAIS will be sharing some materials including messages, videos, posters and others. We are also planning two seminars that will touch on the topics of aviation and workplace safety. If you are planning safety campaigns outside of this period, you are also welcome to register to receive the materials.

Aviation Safety: In conversation with CAAS and Aerospace Leaders

Held in conjunction with AAIS Industry Safety Week

 Nov 14, 2022
(2:00 PM - 4:30 PM)
(GMT+8)

 AAIS Training Room
West Camp Road 690
...

The aerospace industry is progressing beyond recovery into growth, and our skies and shopfloors are getting busier. As the industry recruits fresh talent and as the tempo of operations picks up, safety must remain our top priority. It is in this spirit that we are organising the inaugural **AAIS Industry Safety Week** from 14-18 November.

To kick off Safety Week, AAIS is proud to bring together a panel of speakers comprising representatives from CAAS, Rolls-Royce, and Bell Textron Asia, to give their take on Aviation Safety in Aerospace MRO and Manufacturing organisations. Join us for this opportunity to learn and discuss best practices and challenges to implementing effective Aviation Safety Management System (SMS) in aerospace MRO and manufacturing organisations.

Join us for this hybrid event, and register by Friday 11 November to join us in person.
